

FACULTY OF CIVIL ENGINEERING

SUBJECT CARD

Name in English: Hydraulics in Civil Engineering
Name in Polish: Hydraulika w budownictwie
Main field of study (if applicable): *Civil Engineering*
Specialization (if applicable): Civil Engineering
Level and form of studies: ~~1st~~ 2nd level*, full-time / ~~part-time~~*
Kind of subject: obligatory / ~~optional~~ / ~~university-wide~~*
Subject code: CEB007861
Group of courses: YES / NO*

	Lecture	Classes	Laboratory	Project	Seminar
Number of hours of organized classes in University (ZZU)	15			15	
Number of hours of total student workload (CNPS)	30			30	
Form of crediting	Examination / crediting with grade *	Examination / crediting with grade *	Examination- / crediting with grade *	Examination / crediting with grade *	Examination- / crediting with grade *
For group of courses mark (X) final course					
Number of ECTS points	1			1	
including number of ECTS points for practical (P) classes				1,0	
including number of ECTS points for direct teacher-student contact (BK) classes	1,0			0,6	

* delete as appropriate

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Student possesses knowledge of the areas of mathematics and physics, basic hydraulics, geology and hydrogeology.
2. Student possesses knowledge of the basic property of the solid body and liquids.

SUBJECT OBJECTIVES

- C1. Gaining knowledge in the range of hydraulics laws, with hydrostatics and hydrodynamics
- C2. Gaining knowledge in the range of pressure pipe flow and open channel flow, in steady and unsteady movement.
- C3. Gaining knowledge in the range of porous media water flow.
- C4. Gaining knowledge in the range of hydraulic calculations including: hydrostatic force acting on the flat and curved surfaces, simple hydraulic systems calculation, open channel designing, determining of bridges and culverts cross-sections, designing of solid and temporary dewatering systems,.
- C5. Gaining knowledge of realizing laboratory measurements in the range of hydrostatics and hydrodynamics.

SUBJECT EDUCATIONAL EFFECTS

Relating to knowledge:	
PEK_W01	Knows and understands the basic hydraulics laws in the range of hydrostatics and hydrodynamics, with the equations describing laminar and turbulent flows of compressible and non compressible fluid (Navier-Stokes and Reynolds equations)
PEK_W02	Knows theory of laminar and turbulent flow in pressured pipes, with Bernoulli's equation, equations for friction and local loss of head calculation.
PEK_W03	Gaining knowledge in range of open channel flow calculations, with Chezy equation, calculations principles of most hydraulically efficient cross-section, knows theory of critical movements.
PEK_W04	Knows theory of porous media flow and gaining knowledge in range of simplified hydraulic filtration model.
PEK_W05	Gaining knowledge in range of hydro-engineering structures, with siphons and syphons, bridges and culverts.
Relating to skills:	
PEK_U01	Gaining skills of hydrostatic force calculation on flat and curved surfaces, buoyancy force of submerged solid body.
PEK_U02	Gaining skills of orifices outflow and weir discharge calculation.
PEK_U03	Gaining skills of simple water system calculation, consists of series or parallel pipes.
PEK_U04	Gaining skills of open channel project.
PEK_U05	Gaining skills of horizontal or vertical drainage system calculation of building trench.
PEK_U06	Gaining skills of small bridge or culvert cross-section calculation.
PEK_U07	Gaining skills of laboratory and ground measurements in the range of flow velocity and discharge, stage or depth of water flow
Relating to social competences:	
PEK_K01	Is able to work individually on the realization of strict designing problem or in the team during realizing of ground or laboratory measurements.
PEK_K02	Is conscious of necessity knowledge widening in the range of contemporary technologies in hydraulics and computer programs for designing of hydro-engineering structures.

PROGRAMME CONTENT		
Form of classes – lecture		Number of hours
Lec1	Short history of hydraulics as the science. Fundamental physical properties of water. Newton' law. Forces in fluid field. Pressure definition and its properties. Hydrostatics force on flat and curved surfaces. Buoyancy – Archimedes's law.	2
Lec2	Principles of fluid flow. Types of fluid motion in pipes and open channels. Basic hydraulics equations – continuity equation, energy equation, and momentum equation. Reynold's experiment. Water flow in pipes. Friction factor for laminar and turbulent flow.	2
Lec3	Water flow in closed conduits or pipes, local head losses. Designing of simple pressured pipes. Designing of siphons and syphons – calculating examples. Partially full closed conduits.	2
Lec4	Designing of the most hydraulically efficient open channels. Calculating of stage – discharge relation for natural river cross-section. Numerical models of open channel flow. Specific energy definition with open channel flow. Critical water flow in open channels. Calculating examples.	2
Lec5	Gradually and rapidly varied flow. Hydraulic jump as the example of rapidly varied flow. Differential equation of gradually varied flow in open channels – artificial and natural ones. Unsteady water flow in closed conduits and in open channels.	2

Lec6	Water outflow through orifices. Weirs and their classification in the range of constructional solutions and hydraulics of the water flow. The principles of weirs calculations. Calculation of road culverts. Spillways and stilling basins of the dams creating storage reservoirs. Control cross-sections of hydro-engineering structures.	2
Lec7	Ground and laboratory measurements, of pressure, water stages, water depths, velocity or flow discharge. The principles of ground water flow. Darcy's and Dupuit's Law. Laminar and turbulent ground water flow.	2
Lec8	Class test	1
	Total hours	15

Form of classes – class		Number of hours
Cl1		
...		
	Total hours	

Form of classes – laboratory		Number of hours
Lab1		
...		
	Total hours	

Form of classes - project		Number of hours
Proj1	Hydrostatic force calculation on flat and curved surfaces, determining of direction of acting and point of force imposing.	2
Proj2	Project of water supply system of construction site, with determining of water requirement, the choice of source of water uptake, the choice of diameter of supply pipe.	2
Proj3	Project of sewage system, with waste water balance, choice of waste water receipt, the choice of diameter of sewage conduit.	2
Proj4	Discharge calculation in open channels. Project of optimal cross-section of an open channel.	2
Proj5	Determining of flow condition on the chosen length of natural river, with water passing through bridge or culvert cross-section with HEC-RAS numerical model.	7
	Total hours	15

Form of classes - seminar		Number of hours
Sem1		
...		
	Total hours	

TEACHING TOOLS USED	
N1. Laptop with Power Point for multimedia presentation.	
N2. Computer programs in computer laboratory of Institute of Geotechnics and Hydrotechnics, for realizing of project exercises.	

EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT		
Evaluation (F – forming (during semester), P – concluding (at semester end))	Educational effect number	Way of evaluating educational effect achievement
F1 (lecture)	PEK_W01 ÷ PEK_W05	
P = F1 (lecture)		Written test – questions on theory and practical problems.
E2 (project)	PEK_U01 ÷ PEK_U07	
P = F2 (project)		Customize of the multi elemental project.
