

PROGRAM OF STUDIES

FACULTY: Civil Engineering

MAIN FIELD OF STUDY: civil engineering

BRANCH OF SCIENCE: engineering and technical sciences

DISCIPLINES:

D1 Civil engineering and transport (major discipline)

~~D2*~~

~~D3*~~

~~D4*~~

EDUCATION LEVEL: ~~first level (licencjat/inżynier) studies~~ / second-level studies / ~~magister uniform studies*~~

FORM OF STUDIES: full-time studies / ~~part time studies*~~

PROFILE: general academic / ~~practical~~ *

LANGUAGE OF STUDY: English for SPECIALIZATION: Civil Engineering

Content:

1. Assumed learning outcomes – Attachment no. 1 to the program of studies
2. Description of the program of studies – Attachment no. 2 to the program of studies
3. Plan of studies – Attachment no. 3 to the program of studies
4. Course catalogue, subject card – Attachment no. 4 to the program of studies
5. Plan of studies (semestral layout ver. 2) – Attachment no. 5 to the program of studies

Resolution of the of the Senate of Wrocław University of Science and Technology

nr 742/32/2016-2020 z dnia 16.05.2019 r.

In effect since 1.10.2019 r.

*delete as applicable

DESCRIPTION OF THE PROGRAM OF STUDIES

FACULTY: Civil Engineering

MAIN FIELD OF STUDY: Civil Engineering

EDUCATION LEVEL: ~~first-level (licencjat/inżynier) studies~~ / second-level studies / ~~magister uniform studies~~*

FORM OF STUDIES: full-time studies / ~~part-time studies~~*

PROFILE: general academic / ~~practical~~*

SPECIALIZATION: Civil Engineering

LANGUAGE OF STUDY: English

1. General description

| | |
|---|----|
| 1.1. Number of semesters: | 3 |
| 1.2. Total number of ECTS points necessary to complete studies at a given level: | 90 |
| 1.3. Total number of hours: | 65 |
| <p>1.4. Prerequisites (particularly for second-level studies):</p> <p><i>An applicant for second level studies in Civil Engineering in the Civil Engineering Department of Wroclaw University of Technology must have qualifications of first level studies and be competent in continuing education at second level studies in this faculty. Candidates applying for second level studies in Civil Engineering must:</i></p> <ul style="list-style-type: none"> - <i>possess knowledge from selected fields of mathematics and physics which enables the understanding of the physical basis of construction and also the formulation and solving of simple problems in the area of civil engineering;</i> - <i>possess knowledge from chemistry which enables the understanding of the basis of chemical properties and the construction of building materials;</i> - <i>be able to read and understand architectural, constructional and geodesy drawings and make proper project documentation in a graphical environment on selected CAD software;</i> - <i>possess knowledge and be competent in the area of structural mechanics, strength of materials and principles of the general formation of building structures;</i> - <i>possess knowledge and ability to apply the principles of structural mechanics and bar construction analysis in the areas of statics, dynamics and stability;</i> - <i>be able to apply appropriate computational models and carry out structural mechanic analysis of simple bar structures which are statically determinate and indeterminate;</i> - <i>possess knowledge and skills in the area of designing selected elements and simple constructions made of: metal, reinforced concrete, wood, masonry and composite;</i> - <i>possess knowledge and basic skills in designing hydrotechnical and bridge building structures and structures related to transport infrastructure;</i> - <i>knows the basics of soil mechanics and principles of modeling, dimensioning and construction of foundations;</i> - <i>knows the basics of building physics and understand the phenomenon of heat transfer and diffusion of moisture in building objects;</i> - <i>be able to select and apply correct tools for solving issues regarding analysis, building structure design and carrying out construction works;</i> - <i>be able to estimate costs and formulate schedules of building works, building site developments and building works execution projects;</i> - <i>possess skills in the area of interpretation, presentation and documentation of simple experiments and also in the area of presentation and documentation of the results of task implementation with project characteristics.</i> <p><i>The principles for verifying the competencies of candidates are determined by the appropriate resolutions of the Faculty Council.</i></p> | |

1.5. Upon completion of studies graduate obtains professional degree of:

magister inżynier

1.6. Graduate profile, employability:

After finishing second level studies in the Civil Engineering Faculty, a graduate, using his acquired knowledge and skills is ready to make decisions regarding the appropriate usage of materials, construction design and construction projects. Knows the current trends in the design and execution of building projects. Uses principles of occupational health and safety. Is able to design buildings, knows the principles of structural mechanics and is able to formulate, create, and then use the appropriate computational models of complex engineering structures. Can make and read technical drawings, recognize geodesy and cartography documentations and manage construction works. Is able to formulate and solve new engineering, technical and organizational issues related to civil engineering. Can use modern computer aided technics in the design of constructional structures and projects. Can critically select arguments supporting collective decisions related to the execution of tasks in civil engineering. Is able to formulate and publish reports on the progress of carried out works.

Is able to work in a team and supervise a team's duties. Is responsible for the safety of a supervised team. Is aware of the need to improve his professional and personal competence. Follows ethical rules. Knows and uses the principles of construction law.

Has language skills in the fields of science and scientific disciplines relevant to the studied faculty and requirements for B+ level of the Common European Framework of Reference for Languages. Is prepared to continue his education at third level studies. Graduates are able to: solve complex design, organizational and technological issues, formulate and carry out research programs, run projects of international scope, participate in the marketing and promotion of building products, continue their education and participate in research and disciplines directly related to civil engineering and building production, constantly update their qualifications and knowledge and also manage large groups of people. Graduates are qualified to take a job in: construction and design offices, executive enterprises, research institutes and development centres and also guidance institutions disseminating knowledge from civil engineering.

Futhermore, graduates of each specialization achieve additional extended competence referring to the education outcomes of their specialization:

A graduate of Building Structures possesses enriched knowledge and advanced design skills in the area of pre-stressed concrete structures, complex structures and high and thin-walled constructions. Furthermore, a graduate is competent at solving issues related to the rheology, reliability and limit states of constructions and also failures and renovations of constructions. A specificity of the specialization in Building Technology is to provide graduates extensive knowledge and competency in the area of methods of executing building structures, organizing building works, procedures of executing building investments and also managing building projects and industrial production of prefabricated elements. Graduates of this specialization possess knowledge and skills referring to the exploitation, renovation, modernization and diagnostics of building structures and real estate management.

The specialization in Hydroengineering Structures enables graduates to be competent in the area of designing hydrotechnical constructions, steel hydrotechnical constructions, specific concrete and municipal buildings. It also provides graduates knowledge about the exploitation and regulation of rivers and water-ways, water power plants, hydrotechnical tunnels, water and sewage installations, the renovation of hydrotechnical constructions and also permanent and temporary water drainage. The extensive competence of graduates of Underground and Urban Infrastructures comes as a result of finishing basic and field courses such as: building works and earth engineering, underground engineering, civil engineering, network infrastructure, maintenance of underground constructions, specific foundations and also foundation engineering in specific terrains. The specialization of Roads and Airports educates students who achieve extensive knowledge and skills in the area of materials and road surfaces, water drainage of traffic infrastructure, theory of road surface dimensioning, computer aided designing of roads and airports and also municipal engineering and municipal transport services.

Furthermore, graduates are competent in the area of transport systems. The specialization of Railway Engineering gives graduates extensive knowledge and competency in the area of rail surfaces theory, rail works technology, the design of railway stations, railway traffic engineering, railway traffic navigation, railway exploitation, municipal engineering, drainage of traffic infrastructure, rail surface diagnosis, durability and reliability of rail surfaces and also computer methods in designing railway trucks. A graduate of the specialization of Bridges, apart from possessing the same knowledge as graduates from the other specialisations, also has extended knowledge and skills in the area of bridge construction theory, the design and execution of concrete, metal and wooden bridges, computer aided design of bridges, testing and rehabilitation of bridges and primer coat constructions. A graduate also has a possibility to become acquainted with the computer systems which aid bridge management.

Furthermore, graduates are competent in the area of transport systems. The specialization of Railway Engineering gives graduates extensive knowledge and competency in the area of rail surfaces theory, rail works technology, the design of railway stations, railway traffic engineering, railway traffic navigation, railway exploitation, municipal engineering, drainage of traffic infrastructure, rail surface diagnosis, durability and reliability of rail surfaces and also computer methods in designing railway trucks. A graduate of the specialization of Bridges, apart from possessing the same knowledge as graduates from the other specialisations, also has extended knowledge and skills in the area of bridge construction theory, the design and execution of concrete, metal and wooden bridges, computer aided design of bridges, testing and rehabilitation of bridges and primer coat constructions. A graduate also has a possibility to become acquainted with the computer systems which aid bridge management.

Theory of Structures is a specialization for particularly talented students. Graduates of this specialization are competent in the area of mathematical methods in mechanics, theory of plain girders and solving problems regarding the reliability and limit states of constructions. Furthermore, they possess extensive knowledge and skills in the dynamics of continuous systems, rheology and computer construction modelling.

The specialization of Civil Engineering carried out in English language provides graduates with extensive knowledge and competency in the area of the design and execution of multiple building structures such as: complex structures with reinforced concrete or metal constructions, housing buildings, municipal constructions, roads and highways, bridges and also objects of railway infrastructures. Furthermore, a graduate possesses extensive knowledge in the area of Hydraulic issues and also computer aided design. Each graduate can achieve more knowledge about the chosen constructions after choosing one of the wide range of blocks that are on offer.

| | |
|--|--------------------------|
| 1.7. Possibility of continuing studies: | 3rd level studies |
| 1.8. Indicate connection with University's mission and its development strategy: The Civil Engineering Faculty on second level studies with specializations carried out during full-time studies: Building Structures; Building Technology; Hydroengineering Structures; Underground and Urban Infrastructures; Roads and Airports; Railway Infrastructure, Bridges, Theory of Structures; Civil Engineering (conducted in English) which is run according to the mission and development strategy of the Civil Engineering Department of Wroclaw University of Technology. Studies on the Civil Engineering Faculty are closely related to scientific and research works carried out at the Civil Engineering Department by the chairs and divisions. | |

2. Detailed description

| | | | |
|---|-------------|-------------------|---------------------------|
| 2.1. The total number of learning outcomes in the program of study: | directional | W (knowledge) = | 15 |
| | | U (skills) = | 17 |
| | | K (competences) = | 7 |
| | | W + U + K = | 39 |
| 2.2. For the main field of study assigned to more than one discipline - the number of learning outcomes assigned to the discipline: | | | |
| D1 (major), (this number must be greater than half the total number of learning outcomes) | | | 39 |
| D2 - | | | |
| D3 - | | | |
| D4 - | | | |
| 2.3. For the field of study assigned to more than one discipline - percentage share of the number of ECTS points for each discipline: | | | |
| D1 | | | % points ECTS: 100 |
| D2 - | | | |
| D3 - | | | |
| D4 - | | | |
| 2.4a. For the general academic profile field of study – the number of ECTS points assigned to the classes related to the University's academic activity in the discipline or disciplines to which the faculty is assigned (must be greater than 50% of the total number of ECTS points from 2.1): | | | 82 |
| 2.4b. For the practical profile field of study - the number of ECTS points assigned to the classes shaping practical skills (must be greater than 50% of the total number of ECTS points from 2.1): | | | - |
| 2.5. Concise analysis of compliance of the assumed learning outcomes with the needs of the labor market The education program aims to comprehensively prepare highly qualified engineering technical staff in the widely considered field of civil engineering. Graduates of the Civil Engineering Department with the general academic profile are prepared to work independently in the field of organization and implementation of construction processes, managing the maintenance and exploitation of building infrastructure and are also prepared to participate in building structure designing processes. Graduates possess the knowledge and skills necessary to organize and direct a team's work in all areas of civil engineering. Education profiles and diploma specializations prepare students to be able to undertake work in the most wanted market areas: cubature building, industrial structures and also management of building processes (Building Structures; Building Technology), water constructions, ground and underground structures (Hydroengineering; Underground and Urban Infrastructures) and also in the area of transport infrastructure structures (Roads and Airports, Railway Infrastructures, Bridges). Universal basic knowledge enables graduates to flexibly adapt to the changing needs of the labour market. The specialization of Theory of Structures prepares graduates for research and science work, and the specialization Civil Engineering (conducted in English) gives graduates the opportunity to establish cooperation with international construction companies. The basis of all specializations is knowledge and skills which enable graduates to obtain appropriate professional qualifications. | | | |

| | |
|---|------|
| 2.6. The total number of ECTS points that a student must obtain in classes requiring direct participation of academic teachers or other persons conducting classes and students (enter the sum of ECTS points for courses / groups of courses marked with the BK1 code) | 37.9 |
| 2.7. Total number of ECTS points which student has to obtain from basic sciences classes | |
| Number of ECTS points for obligatory subjects: | 4 |
| Number of ECTS points for optional subjects: | 0 |
| Total number of ECTS points: | 4 |
| Number of ECTS points for obligatory subjects: | 38.5 |
| Number of ECTS points for optional subjects: | 8.5 |
| Total number of ECTS points: | 47 |
| 2.9. Minimum number of ECTS points, which student has to obtain doing education blocks offered as part of university-wide classes or other main field of study (enter number of ECTS points for courses/groups of courses denoted with code O) | 8 |
| 2.10. Total number of ECTS points, which student may obtain doing optional blocks (min. 30% of total number of ECTS points): | 65 |

3. Description of the process leading to learning outcomes acquisition:

The following elements are taken into account in the process of obtaining the required resources of knowledge, skills and social competences obtained in the learning process:

- various subjects along with the assigned ECTS points for different didactic forms,
- subjects include specific thematic content, implemented in the form of didactic classes, in particular in the form of a lecture, laboratory, exercises, seminar, practices specified in the study program; the subject may include more than one form of classes; the subject or group of subjects may be a block for which the assumed learning outcomes have been assigned in the curriculum
- learning outcomes in the field of knowledge, skills and social competences with the adaptation of the WBLiW PWr (for an academic profile) building to the Characteristics of the Polish Qualifications Framework for Higher Education,
- learning outcomes have been defined for the subject, specialization and subject,
- a plan of studies taking into account various specialties as well as compulsory and optional subjects, as well as subjects in the field of general education, basic sciences, major and specialties,
- various forms of verification and assessment of student achievement of assumed learning outcomes (examinations, pass).

4.1.1.3. Block Sport classes

(min. 1 ECTS)

| No | Course / group of courses code | Name of course / group of courses (denote group of courses with symbol GK) | Weekly number of hours | | | | | Field-of-study educational effect symbol | Number of hours | | Number of ECTS points | | Form ² of course / group of courses | Way ³ of crediting | Course/group of courses | | | |

|-----------------------|---|---|------|
| Number of ECTS points | Number of ECTS points for BK ¹ classes | Training crediting mode | Code |
| | | There is no obligatory training in the programme for the 2nd level studies. | |
| Training duration | | Training objective | |
| - | | - | |

4.4. Diploma dissertation block (Faculty Council Resolution on regulations on final thesis and thesis exam no. 112/8/2012-2016 from 27.03.2013)

| Type of diploma dissertation | Master | |
|--|-----------------------|-----------|
| Number of diploma dissertation semesters | Number of ECTS points | Code |
| 1 | 18 | CEB099963 |
| Character of diploma dissertation | | |
| Master Thesis carried out at the second level studies can be a study, study and design or experimental and design one. It should demonstrate a graduate skills acquired during the studies, its scope should not go beyond the issues included in the programme of courses, both of the main field and specialization ones, with regard to the matters contained in the learning outcomes for the 1st level studies. | | |
| Number of BK ¹ ECTS points | 0.3 | |

5. Ways of verifying assumed educational effects

| Type of classes | Ways of verifying assumed educational effects |
|----------------------|---|
| lecture | e.g. examination, progress/final test |
| class | e.g. progress, final test, presentation |
| laboratory | e.g. pretest, report from laboratory, presentation |
| project | e.g. report, project defence |
| seminar | e.g. participation in discussion, topic presentation, essay |
| training | e.g. report from training |
| diploma dissertation | prepared diploma dissertation, defence, examination |

6. Range of diploma dissertation

General rules for the organization and conduct of the final diploma exam is specified in § 25 of the Regulations of higher education at the Technical University of Wrocław.

The exam consists of two parts:

- a) presentation of master thesis subject, methods used for its realization and the results obtained; the defense of the thesis by providing the student answers (oral or drawing) on oral questions of the Diploma Examinations Commission members asked during or immediately after the presentation of the work; questions must only touch the thesis content and the applied methodology;
- b) an oral examination in the field of core and specialization subjects with the aim to review the student's knowledge in a range specified in the curriculum of the specialization of the second-degree. The student is asked at least three questions, two of which concerning major subjects and at least one must refer the subjects of specialization. The curriculum for each specialization is placed on the website of the Faculty. The exam cannot contain questions of the issues that were not in the program of study being completed by the student

7. Requirements concerning deadlines for crediting courses/groups of courses for all courses in particular blocks

According to the Regulations of higher education at the Technical University of Wrocław.

PLAN OF STUDIES

FACULTY: Civil Engineering

MAIN FIELD OF STUDY: Civil Engineering

EDUCATION LEVEL: ~~first-level (licencjat/inżynier) studies~~ / second-level studies / ~~magister uniform studies~~*

FORM OF STUDIES: full-time studies / ~~part-time studies~~*

PROFILE: general academic / ~~practical~~*

SPECIALIZATION: Civil Engineering

LANGUAGE OF STUDY: English

Resolution of the Senate of Wrocław University of Science and Technology no. 742/32/2016-2020 from 16.05.2016

In effect since 1.10.2019 r.

1. Set of obligatory and optional courses and groups of courses in semestral arrangement

Definitions:

¹BK – number of ECTS points assigned to hours of classes requiring direct contact of teachers with students

²Traditional – T, distance – Z

³Exam – E, crediting with grade – Z. For the group of courses – after the letter E or Z - enter in brackets the final course form (lec, cl, lab, pr, sem)

⁴University-wide course /group of courses – O

⁵Practical course / group of courses – P. For the group of courses (GK) - in brackets enter the number of ECTS points assigned to practical courses

⁶KO – general education, PD – basic sciences, K – field-of-studies, S – specialization

⁷Optional – W, obligatory – Ob.

CNPS – total student's work; ZZU – organized courses; 1 ECTS = 30 hrs NPS

Blocks for optional specialization: Civil Engineering CEB [9]
Specialization: Civil Engineering (language of studies: English)

Semester 1

Obligatory courses

PLAN OF STUDIES

FACULTY: Civil Engineering

Attachment no. 5 to the program of studies

MAIN FIELD OF STUDY: Civil Engineering

EDUCATION LEVEL: ~~first-level (licencjat/inżynier) studies / second-level studies / magister uniform studies*~~

FORM OF STUDIES: full-time studies / ~~part-time studies*~~

PROFILE: general academic / ~~practical*~~

SPECIALIZATION: Civil Engineering

LANGUAGE OF STUDY: English

Resolution of the Senate of Wrocław University of Science and Technology no. xxx from xx.04.2019 r.

In effect since 1.10.2019 r.

Prerequisites for specializations

Civil Engineering CEB

Specialization is intended for graduates of all universities that meet the general requirements of competence for candidates to study a second degree at WBLiW at the Wrocław University of Technology - the graduation degree in the fields of construction or similar (called "related fields-of-study") in the Law Building and regulations issued thereunder). Requires possessing of the knowledge and skills (learning outcomes) for the civil engineering field of study, according to the program of study at the Faculty of Civil Engineering of WUT. Students not meeting this requirement, you should complete the missing knowledge in the context of self-education (literature is given). Foreign candidates, not speaking Polish language, are also accepted for the studies.
